

Second paper: "Psychological, Relational, and Emotional Effects of Self Disclosure After conversing with a chatbot", is a paper that analysis the affect of disclosure of personal emotional facts and feelings to a chatbot. when disclosers believe they are interacting with a human, there is an additional human element, while when disclosing to a chatbot, there may be bias against it, or bias favoring it. This is analysed and the paper aims to find if disclosing to a human or chatbot can result in the same outcome of emotional catharsis.
